*Our entire range can be custom printed*

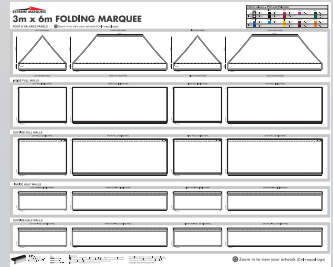

Extreme Marquees revolutionized the marquee industry over 10 years ago when we started digitally printing (100% print coverage) on our marquee canopies & accessories. Since then we have become market leaders with our exceptional high quality printing, fabrics and turn around periods.

At Extreme, we are capable of printing any logo, text or photograph anywhere on a canopy or panel. The printed panels are not limited by colour or the amount of colours used per panel or the amount of graphics.

Once the design brief and high resolution artwork has been provided the layout will be created by one of our in-house Graphic Designers. If the layout requires any changes our team will complete this at no extra charge.

Our in-house graphics team here to assist you through every step of the artwork design process.

### Artwork templates

Once an order has been confirmed, design brief and high resolution artwork (logos & graphics) has been supplied our Graphics Department will create a pre-print layout using one of our templates.

Customers can make as many design changes as required and once the layout has been approved this artwork will go into production.

You can download templates from the website or at your request we can email copy to you in either EPS or PDF.
