APPLICATION													
<p>The Extreme Mate is a durable entry level marquee. Featuring a 32mm powder-coated steel square-leg frame, the Mate offers a quick and easy setup. A PVC coated polyester fabric roof comes standard and offers light weight durability. Roofs are available in 8 vibrant colours or can be custom printed.</p>		<p>The 45mm Hex A features ultralight 45mm profile aluminium hexagonal legs. Our team of engineers have created a unique balance between the strength in the hexagonal leg design and the light-weight aluminium profile. The Hex A range is perfect as an affordable aluminium marquee that is also the lightest marquee in our range. Roofs are PVC coated polyester and available in 8 vibrant colours or can be custom printed.</p>		<p>The Extreme Explorer is a medium strength range built with a 30mm aluminium square leg profile. This model is the lightest in our range that features aluminium connectors and steel feet. The explorer marquees are quick and easy to set up with pull ring pins in the legs. This range includes a PVC coated polyester roof available in 8 vibrant colours or can be custom printed.</p>		<p>The K2 is a strong, robust, all aluminium, medium weight frame built to last. This range features a 37mm aluminium square leg frame with aluminium connectors and steel feet. These frames are easy to setup with pull rings in the legs and keep the roof tight with a spring loaded tensioning system. This range of marquees is ideal for regular use and available in either 100% PVC or PVC coated polyester roof fabric.</p>		<p>The new True Blue Marquee range is ready for anything the tough Australian climate can throw at it! The 45mm hexagonal leg profile is made from iron ore mined deep in the great Australian outback. Made from steel, this new marquee frame will last for years. The canopy is produced from our high quality 500D, UVF 50+, waterproof polyester and will protect you and your family from the suns dangerous UV rays.</p>		<p>The Summit is our flagship marquee range. The highest quality and most popular commercial grade marquee in Australia. The Summit features a 40mm aluminium square leg frame. All connectors are made from high quality extruded aluminium and includes steel feet for a strong base. The roof is spring tensioned and is available with either 100% PVC or PVC coated polyester fabric. This range of marquee is suited for any commercial grade purpose and is built to last.</p>		<p>The Extreme Tectonic Range is built to last. Built with 57mm hexagonal aluminium legs, the tectonic is the most heavy duty folding marquee on the Australian market. The frame also features pull ring pins for ease of setup, extruded aluminium connectors, steel feet and a spring tensioned roof system. Roofs are PVC coated polyester and available in 8 vibrant colours or can be custom printed.</p>
